

MonoBehaviour

```
classDiagram
    class MonoBehaviour
    class ExampleView["usea.graphics.view.ExampleView"] {
        + m_slider
        + m_button
        + m_toggle
    }
    ExampleView --|> MonoBehaviour
```

The diagram illustrates a class hierarchy. At the top is the 'MonoBehaviour' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. At the bottom is the 'usea.graphics.view.ExampleView' class, represented by a larger rectangle with a dark grey header containing the class name, a middle section with three attributes, and a dark grey footer. A blue arrow with an open triangular head points from the 'ExampleView' class up to the 'MonoBehaviour' class, indicating that 'ExampleView' inherits from 'MonoBehaviour'.
